AFV INSTITUTE LAUNCHES 2009/2010 BUYERS' GUIDE
Complete Listing of Alternative Fuel Vehicles and Technologies to Purchase Today

Las Vegas, NV – June 17, 2009: Alternative Fuel Vehicle Institute (AFVi) announces the publication of the annual 2009/2010 AFV Buyers' Guide designed as an easy to use, decision-making tool for fleet managers who need information on alternative fuel and advanced technology vehicles. This guide includes all vehicle classes and a complete list of available options that operate efficiently, reduce greenhouse gas emissions, improve air quality and increase energy security.

“Oil prices are beginning to climb again and, every time that happens, AFVi is inundated with requests for information on non-petroleum vehicle options that will lower fuel costs,” said Annalloyd Thomason, Executive Director of AFVi. “The Buyers' Guide is a direct response to requests from purchasers who want an easy to understand purchasing directory of currently available AFVs.”

The Guide is divided by vehicle class, from Class 1 through Class 8. Other sections include Small Volume Manufacturers, Engine Manufacturers, OEM contact Information, Industry Listings, a Cross Reference Directory and Industry Acronyms. The Guide includes basic specifications for all the known and commercially-available AFVs, engines and advanced transportation technologies.

The Buyers' Guide is value-priced at \$249. However, for a limited time we are offering it at an introductory price of \$199, plus \$5.95 shipping and handling. A volume-discounted price of \$149 per copy is available and shipping is FREE for orders of ten copies or more. The Guide is available for purchase exclusively through AFVi at www.afvi.org.

Alternative Fuel Vehicle Institute (AFVI) is an entrepreneurial organization that works through industry to bring people in need of proven transportation technologies together with those who can meet their needs. AFVI is fuel and technology neutral.
